Skills

Java | Spring Boot | Microservices | Kafka | Redis | PostgreSQL | REST APIs | Docker | AWS | Python | System Design

Work Experience

OneShield | Software Engineer | **Java, Spring Boot, Microservices, Python, AI Automation** **July'24 - Present**

- Architected a two-phase API-driven onboarding Java utility replacing the legacy engineer-dependent process with a BA-operable system, **reducing per-client onboarding from weeks to days**, and delivered 30% ahead of estimate.
- **Modernised** the company's **decade-old Java-based API platform** by implementing key components of a new wrapper layer and developing an early microservice POC, improving developer experience and significantly reducing onboarding friction for new enterprise customers.
- Designed and productionised a Python utility that auto-builds API documentation from metadata by replicating schema generation logic from a **legacy Java platform** component, cutting endpoint discovery and request construction time from **30 minutes+ to seconds** and standardising API contracts (40% of the API team's quarterly deliveries).
- Developed a Chrome extension to auto-generate Cucumber tests with intelligent UI search (99% accuracy), autofill test data, and manage credentials, reducing manual setup and debugging effort. Adopted by 50+ engineers across QA and dev teams.
- Built a custom **MCP** (Model Context Protocol) server integrating Windsurf with OneShield's internal configuration platform, enabling AI-powered config querying and codebase analysis directly in the development workflow, **accelerating complex engineering tasks by 20-30% over standard AI tools**.
- Developed an AI agent that automated 100+ API test scenarios (reducing authoring time from **30-40 min to 10 min each**), and applied AI-augmented workflows across POC analysis and platform adoption, delivering **60+ API adoptions in 2 weeks vs a 4-week estimate**, recognised by VP as exceptional delivery.
- Improved legacy API reliability by fixing schema inconsistencies, missing validations, and endpoint gaps, while maintaining detailed Postman documentation for QA/integration teams.

Gfial | Frontend Intern | **React, Redux, CSS** **Oct'22 - Jan'23**

- Improved React/Redux application stability by restructuring UI components and reducing frontend defects by 30%.

Projects

Distributed Order Processing Platform | **Java, Spring Boot, PostgreSQL, Redis, Kafka, Docker**

- Built a production-style backend system with REST APIs, Redis caching, Kafka-based async workflows, idempotent payment handling, rate limiting, and structured logging to simulate a scalable backend architecture.
- Implemented DB indexing, pagination, retries, DLQ handling, and load/performance optimizations while practicing system design tradeoffs around consistency, scaling, and fault tolerance.

Brainiac | **FastAPI, Node.js, PostgreSQL, Vector DB, LLM, RAG, LangChain, Next.js, SSO**

- Built AI-powered summarisation and question-answering services using RAG pipelines, vector search, LangChain orchestration, fine-tuned LLM workflows, and semantic retrieval for chat, email (Gmail), and document-processing use cases.
- Engineered scalable backend services with asynchronous processing, model evaluation pipelines, prompt experimentation, and cross-platform integrations across web and browser-extension clients (WhatsApp/Gmail).

CODING AND ACHIEVEMENTS

- Awarded by leadership for innovative problem-solving and high-impact contributions on Project OneExt.
- **ICPC 2023** Regionalist (Rank: 221). CodeChef: highest rating - **1704 (3*)**.
- Won 9+ coding competitions and hackathons with top-3 finishes at IIT Goa (HackOverflow) and NIT Goa (BitBash), along with multiple 1st-place intra-college victories.

LEADERSHIP AND CERTIFICATIONS

- **Coders Club Council Member** - Organised coding challenges, workshops, and coding competitions for students.
- Software Architecture & Design of Modern Large-Scale Systems
- Low-Level Design (LLD): Basics to Advanced
- Introduction to AWS

Education

B.Tech in Computer Science Engineering at Goa Engineering College, 2020 - 2024. CGPA - 8.1.
